Work Experience

Technical Team Member — MSI Tech Society

2024-present

- Contributed to the development and maintenance of internal projects, event pages, and automation tools for the society.
- Assisted in managing tech setups, web assets, and coordinating technical operations during college events.
- Collaborated with team members to plan, design, and execute tech- related initiatives while improving project and code quality.

Freelance Web Developer — Personal Brand Website

2025

- Designed and developed a responsive, high-performance personal brand website using React.js / Next.js, ensuring fast load times and modern UI/UX.
- Implemented reusable components, optimized SEO, and delivered a clean, scalable codebase tailored to client needs.
- Worked directly with the client to understand requirements, improve branding, and create a professional online presence.

Private Tutor — Mathematics & Accountancy (Class 12th)

2024 – Present

- Provided offline tutoring to Class 12th students in Mathematics and Accountancy for 1 year. Helped students understand complex concepts through structured explanations
- and practical problem-solving. Improved communication, teaching ability, and concept simplification skills while managing multiple students.

Full Stack Developer - GLocal Education Talent (Internship)

Jan 2026 - March 2026

- Assisted in developing full-stack web features using modern JavaScript frameworks and backend technologies.
- Implemented frontend components and connected them with backend APIs.
- Used Git/GitHub for version control and collaborated with team members in a hybrid setup.
- Gained hands-on experience in debugging, deployment basics, and production-oriented development workflows.

Projects

Food Ordering Page – Frontend Project

 <https://foodordering11.netlify.app/>

- Built a responsive, visually appealing food ordering interface using HTML5, CSS3, and jQuery.
- Implemented smooth animations and scroll effects using AOS to enhance user engagement.
- Used Ionicons for modern iconography, Normalize.css for consistent styling, and Grid.css for flexible layout management.
- Developed an interactive UI with clean design components, responsive grids, and seamless transitions across devices.

Secrets App – Secure Authentication Web Application

 <https://github.com/MayankJoshi540/secrets-app>

- Developed a Node.js and Express application that enables users to anonymously share their thoughts while maintaining their confidentiality.
- Implemented bcrypt for secure password hashing, incorporated session-based authentication, and fortified routes to ensure robust security.
- Created dynamic views using EJS and enhanced the frontend aesthetics with Tailwind CSS.
- Managed data effectively with MongoDB and Mongoose, ensuring confidentiality through the use of environment variables.
- Deployed the application on Render, facilitating seamless user sessions and the ability to remember logins, akin to a reliable companion.

iBuiltThis - Share What You've Built

 <https://i-built-this-five.vercel.app/> . .

- Developed a modern, responsive web application using Next.js with a focus on clean UI and performance.
- Implemented reusable frontend components and structured the project following best practices.
- Deployed the application on Vercel with optimized builds and production-ready configuration.
- Used Git/GitHub for version control and followed a professional development workflow.
